1. INTRODUCTION

SAFE TRACK CONT. CO. (**STCE**) is a civil and construction company that has built a strong reputation for delivering/supply a quality service, on time, and at a competitive price. We pride ourselves on being skilled and experienced in all aspects of civil construction and this, combined with our extensive knowledge of Kingdom of Saudi Arabia, has established us as major players in this factor.

Our commitment to innovation and excellence invariably results in a successfully completed project for both contractor and client. We understand and promote the idea of working as a partnership with our clients to ensure their goals are met.

At STCE we never rest upon our laurels and are passionate and driven to continue the high levels of customer satisfaction we have achieved over the past years.

We undertake a variety of projects for a wide range of cliental – from small private developments to large Government projects. Our unique and flexible project management systems ensure that a positive outcome is achieved regardless of size or nature of the project.

STCE is officialy registered with Saudi Aramco, SABIC, SCECO & Royal Commission.

We have been working continuously with SWCC, Khobar-Aziziah Area over 5 years as exclusive sub-contractors for Dewatering, Shoring & Earth Works. We have finished around 20 work orders successfully during these years.

YOUR SAUDI ARAMCO VENDOR
REGISTRATION NUMBER: 10053634

SAFE TRACK CONTRACTING ESTABLISHMENT
P.O. BOX 76146
Khobar 31952
Saudi Arabia

Gentlemen,

Thank you for your interest in providing contract services to Saudi Aramco. Your new contractor registration application has been approved and your Company has been assigned the following Vendor Number:

YOUR ASSIGNED SAUDI ARAMCO VENDOR NUMBER: 10053634

(Please note this Vendor Number for your future reference.)

A unique username and temporary password will be sent to each of your Company's Designated Contacts (as specified in your registration application) to enable them to access Saudi Aramco's Electronic Contracting Network (ECN). ECN is accessible through the Saudi Aramco Portal at <http://ecn.vendor.aramco.com>.

It is important to note that this registration merely provides Saudi Aramco with current contact and other basic information about your Company. This registration is different from contractor requalification which is performed separately in connection with a specific contract or group of similar contracts. The method Saudi Aramco uses to prequalify and select bidders for each contract depends on the contract's complexity and urgency in addition to the number of potentially qualified contractors for the required work. The most important source of contractor information that Saudi Aramco will heavily rely on is each registered contractor's Contractor Profile in ECN, which each contractor can update themselves online and at any time.

Therefore, the most important step for your Company to take immediately after receiving your ECN username and password is to promptly complete the remaining sections of your Contractor Profile in ECN. These sections include:

- * Introduction
- * Work Experience
- * Certifications
- * Human Resources
- * Equipment
- * Branches / Camps / Laydown Yards
- * Financial Information
- * Parent Company / Affiliates / Subsidiaries / Sole Agency Agreements

We appreciate your interest in doing business with Saudi Aramco and wish you the best of success.

Sincerely yours,
 Manager
 Saudi Aramco Contracting Department

 Subject: QUALIFICATION

Dear Supplier,

Based on business needs, we are pleased to report that you have been qualified as vendor of Saudi Basic Industries Corporation (SABIC).

Qualification means that you are eligible to receive requests for quotations and orders for the designated materials and / or services. However, there is no guarantee that you will receive any such requests or orders.

Please indicate your Vendor Number as mentioned above when communicating with SABIC for easy reference.

Thank you for your interest in being a supplier to SABIC.

Best Regards,

NITGEN's Fingerprint Access Controller NAC-3000

High Speed Time Recorder & Fingerprint Access Controller with Ai to Sensor.

NAC-3000™ is an advanced product capable of combined card operation with fingerprint recognition system. It is a biometric device that can be used as a standalone device or as a part of a larger system. It is a high speed time recorder and a fingerprint access controller. It is a high speed time recorder and a fingerprint access controller. It is a high speed time recorder and a fingerprint access controller.

- Features:**
- High speed 1.5 fingerprint matches per second
 - TCRIP Fingerprint
 - Automatic Finger Sensing
 - Combine several authentication methods (PIN, password, and RF card)
 - Real time monitoring of access data
 - Access control by period and time
 - Enhance security with multiple user groups (Door lock and Auto on)
 - Easy remote control of hardware
 - Control multiple access control terminals via the network

Section	Size	Content
LCD Display	128 x 64 Dot LCD	
Fingerprint Sensor	Longridge Type: Optical Resolution: 500 DPI Additional: Auto on / Locking check	
Authenticatio	Type: Fingerprint, Password and RF card Speed: 1.5 matches per 1 sec 1:1R mode: Avg. 2.5 sec (1 user, 1 user) Avg. 1.5 sec (1 user, 1 user) Avg. 1.5 sec (1 user, 1 user) Algorithm: FRR: 0.1 % or less, FAR: 0.001 % or less	
Number of users	Server: 5000 users (2 fingerprint per 1 user) 10000 users (1 fingerprint per 1 user)	
Registers	Terminal: 2000 users (2 fingerprint per 1 user) 4000 users (1 fingerprint per 1 user)	
Communication	IC Card: 10 to 10000 users RS-232C: Max 115200 bps (optional) Wiegand: 26, 34, 38 pins (optional)	
Serial Connection	Terminal: Connection allowed up to 255 terminals Cable: Serial connection up to 1000m	
Size	C case: 130 (W) x 80 (H) x 30 (D) mm Bracket: 100 (W) x 115 (H) x 30 (D) mm	
Supported Door	Cardlock / Stake / RM Lock / Automatic	
Power	Adaptor: Input: AC 100 V ~ 240 V, 50/60Hz Output: DC 12 V, 5 A	
Advanced Features	Language: M/C and English included Voice instruction (English / Korean) Alarm buzzer Co-loading Log in Firmware Voltage IC length: 4 ~ 15 Digit	
Option	RF module (M/C)	
Temperature	Operating: -20°C ~ 60°C (with a cooling fan or active cooling)	
Humidity	Storage: 25 ~ 65% Operating: 25 ~ 65% RH Storage: 15% ~ 90% RH

ORBITA IC Card Lock Series

Power Supply: 6AA Batteries or 9V Twin Battery duration of 10000 times (about 1 year)

Static Load: <15uA

Working Load: 200mA~400mA

Locking records: 250pcs

Weight: 3.8kg

Size: 240L x 78W x 17D (mm)

Temperature: -50°C ~ 80°C

Humidity: 20% ~ 80%

Override Mechanical Key: Computer key

Suitable Door Type: Wooden Door, Fire-proof, Metal door

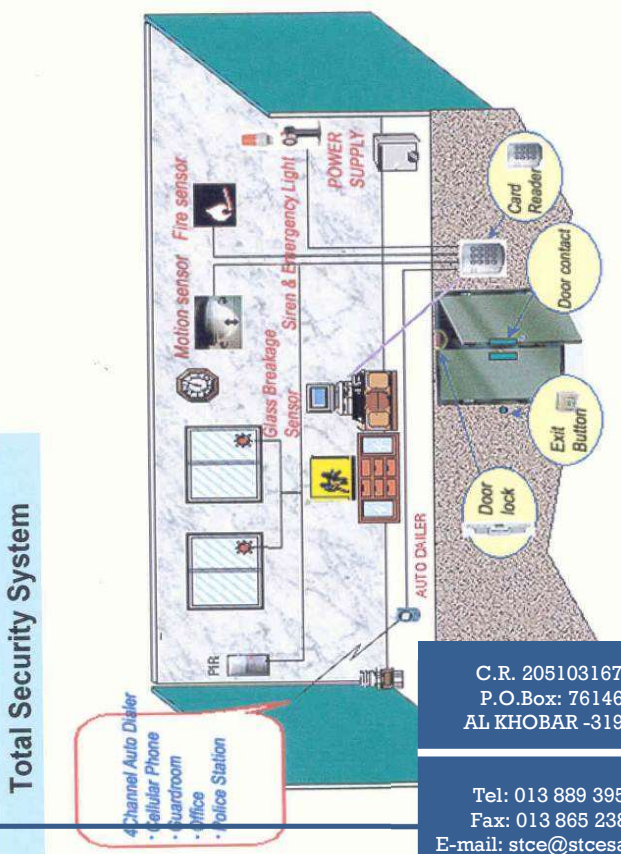

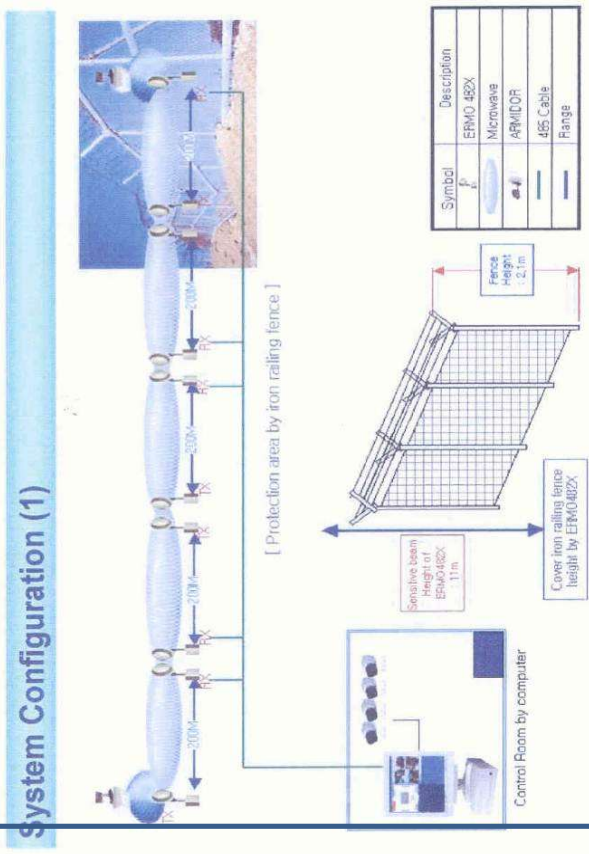

Interface: PMS interface

Material: Moisture proof, Fire retardant

E1180

CE

- Card type: Siemens SLE4442 IC card.
- Material: Cast Stainless Steel
- Finish: Golden, PVD coating.
- Mortise: U.S standard, 5 latch mortise.

1. PROJECT PHOTOS (ELECTRO-)

SERIES 700

Full Height Pedestrian Turnstiles

TURNSTILES

The Series 700 full height turnstile range provides easy to use, rugged and reliable, high security pedestrian control for a wide range of commercial and industrial applications.

Series 700 turnstiles are available in a range of configurations, materials and finishes to match a wide variety of security levels, operational and aesthetic requirements. Finishes include high quality polyester powder coatings in a wide range of colours and several grades of stainless steel. All components are designed to withstand the harshest external environments. A programmable solid state control unit interfaces to all available access control and membership systems.

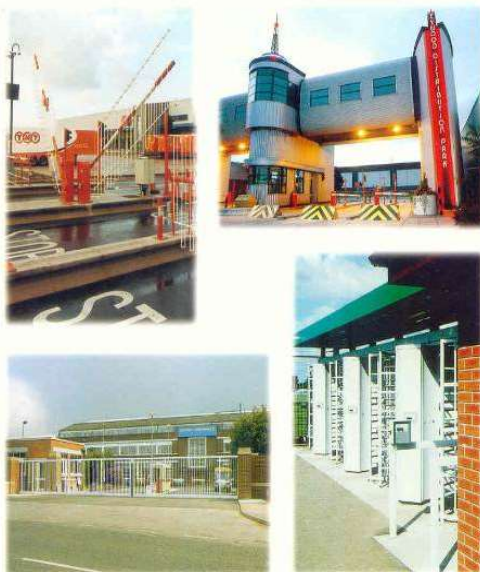

Where absolute control of pedestrian traffic is paramount a full height turnstile is a must and the Series 700 from Broughton Controls is unmatched.

Key FEATURES

- Continuously welded, rugged design, effective for unsupervised operation.
- Reliability proven in football stadia, military sites etc. over long periods with minimum maintenance.
- Available in 120 degree (three arm), 90 degree (four arm), Straight or 'trombone' arms, solid rotor, and single or double configurations for all applications to the highest security.
- Environmental finishes suitable for the most demanding environment.
- Bi-directional electrical operation with rotor movement damped and controlled for user safety and convenience.
- Programmable control unit allows use with all access control systems while factory default settings ensure extremely simple 'connect and operate' installation.
- Key operated overrides allow operation during power failure, manual control and diagnostics.

Entrance Control for business and industry

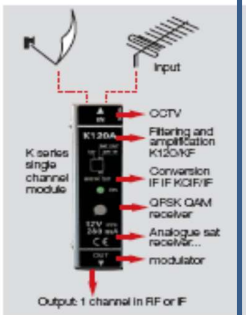

احمي منزلك ومنشأتك من الحريق Protect Your Home & Company From Fire

Fire Alarm Products

K SERIES

K SERIES: KEY POINTS

- Future proof solution**
 - Compliant with DIGITAL programs (DTT receiver)
 - Ability to manage complex channel plans
- Flexible and time saving solution.**
 - The KTP LCD programmer allows modules to be easily adjusted
 - The modules can be fitted easily on the DIN BAR
- Reduce cost.**
 - Uses standard din bar as wall mount rail
 - Uses one broadband amplifier for all the modules (with KF)

2. EARTH RETAINING WORKS

2. EARTH RETAINING WORKS

Retaining walls are structures designed to restrain soil to unnatural slopes. They are used to bound soils between two different elevations often in areas of terrain possessing undesirable slopes or in areas where the landscape needs to be shaped severely and engineered for more specific purposes like hillside farming or roadway overpasses

Our Services

- ◆ **Sheet Piling System**
- ◆ **Shoring System**
- ◆ **Trench Box Shoring**
- ◆ **Dewatering Works**
- ◆ **Anchoring Works**
